Studs have swaged ends to fit inside the track so that both studs & tracks are the same width to assist in providing as flush a finish as is possible.

**TOLERANCES:**
Construction tolerances between frames is +2mm -2mm. Frames are manufactured and assembled to +5mm -5mm.

**NOTE:**
- Head & base tracks to be split either side of the movement joint.
- Each track section to be fixed 60-100mm from the end of the track.
